DEBRIEF
• Did your AI tool strongly recommend a specific player that you later regretted buying, or did it miss a massive value asset?
..... "AI Blindspots"?
• When the real-time AI Shock Events occurred, did you follow the AI's recommendations, or did you overrule them with human intuition? What was the outcome of that choice?
• When the pressure clock started ticking, did you stick strictly to the budget and ROI limits set by your AI?
....Data Vs FOMO?
• How did your prompt engineering approach change from Stage 2 to Stage 3

Academic Integrity
Strictly avoid cheating, plagiarism, or any dishonest practices.
Use university resources (library, labs, internet) responsibly and ethically.

Communication & Behavior
• Use polite, professional, and respectful language at all times.
• Promote harmony, respect cultural diversity, and maintain discipline during events, seminars, and examinations.
